

Educational Programs 2022 - 2023

Dear Colleagues,

Bascom Palmer Eye Institute invites you to its 2022-23 educational events.

Our Global Center for Ophthalmic Education coordinates Bascom Palmer's professional learning at every level. Our medical programs are relevant and applicable to the practice of ophthalmology, showcasing the latest technologies, and highlighting the field's emerging trends.

Our numerous educational programs include our popular continuing medical education (CME) courses on angiogenesis, imaging, cornea, cataract and refractive surgery, and glaucoma; an esteemed Distinguished Lecture Series; the Inter-American Course in Clinical Ophthalmology (CURSO); and Thursday morning's Grand Rounds where our faculty members, residents, and fellows present interesting cases, medical conditions and treatments, and share our latest research advancements.

Besides hosting many of these events at the Bascom Palmer Eye Institute in Miami, many of these courses and lectures are available on a virtual platform.

In addition to our extensive roster of programs, we encourage you to visit BascomPalmerLearn.org, a free online resource for a wide range of vision-related content, including CME courses, ophthalmic images, surgical videos, and lectures. We look forward to connecting with you throughout the year as we learn, discuss and share the very best care for our patients together.

Very truly yours,

Eduardo Alfonso

Eduardo C. Alfonso, MD

Director, Bascom Palmer Eye Institute

44th Annual Inter-American Course in Clinical Ophthalmology (CURSO) and 26th Pan-American Regional Course

The Bascom Palmer Eye Institute and the Pan American Association of Ophthalmology (PAAO) would like to invite you to join us in Miami next October for the first joint CURSO and Pan-American regional course.

The Joint XLIV Inter-American Course in Clinical Ophthalmology (CURSO) and XXVI Pan-American Regional Course is designed for practicing ophthalmologists in Latin America and the Caribbean, to provide maximum emphasis on practical approaches to clinical problems. The program will provide hundreds of ophthalmologists from across Latin America and the Caribbean benefit from the knowledge and expertise shared by the outstanding guest faculty, as well as the faculty from Bascom Palmer Eye Institute. In addition to the course material presented with simultaneous English-Spanish translation, more than 60 commercial exhibitors participate in an accompanying trade show. We look forward to seeing you this October in Miami!

Course Directors:

Eduardo C. Alfonso, MD
Guillermo Amescua, MD
Carol L. Karp, MD
Paul F. Palmberg, MD, PhD

Guest Speakers:

J. Fernando Arevalo, MD, PhD, FACS, FASRS
Juan F. Batlle, MD
Miguel N. Burnier, Jr., MSc, PhD, FRCSC, FARVO
Paulo E.C. Dantas, MD, PhD
Angela Maria Fernandez, MD
Felipe Medeiros, MD, PhD
Victor L. Pérez, MD
Neda Shamie, MD
Roberto Warman, MD

Registration Fee:

\$650 if received on or before
September 26, 2022

\$750 if received after
September 26, 2022

Location:

DoubleTree by Hilton Hotel
Miami Airport and Convention
Center
Miami, Florida
Reservations by Phone:
1-800-774-1500

The modern DoubleTree by Hilton Hotel Miami Airport & Convention Center is connected to the Miami International Merchandise Mart and the Miami Airport Convention Center (MACC). The hotel is just minutes from the Miami International Airport (MIA) and offers 24-hour complimentary airport transportation to and from Miami International Airport.

Hotel Rates: \$179 plus tax;
single or double occupancy.

**No AMA Continuing Medical
Education Credits will be awarded
for this program.*

Practical Applications of Optical Coherence Tomography Technologies in the Diagnosis and Management of Ocular Disease

Optical Coherence Tomography (OCT) is now a widely utilized ophthalmic diagnostic technology. This program, which includes the co-inventors of OCT technology among its faculty, is unique in its approach. The basic physical principles of OCT and new OCT imaging modalities are reviewed, followed by a comprehensive discussion and review of current clinical applications in the diagnosis and management of glaucoma, neuro-ophthalmic, and retinal diseases. In addition, case-based presentations and discussions with faculty and meeting attendees highlight the utility and important role of OCT imaging in identifying ocular disease and its response to treatment in clinical practice for the comprehensive and the sub-specialty ophthalmologist.

Course Directors:

Richard K. Lee, MD, PhD
Jorge A. Fortun, MD

Guest Speakers:

Donald L. Budenz, MD, MPH
James G. Fujimoto, PhD
Yasha S. Modi, MD
Joel S. Schuman, MD, FACS
Rishi Singh, MD

In-person Registration Fee:

\$395

Virtual Program Access: \$100

Location:

 The Breakers, Palm Beach, Florida

A luxurious oceanfront hotel, The Breakers is one of America's legendary resort destinations and listed on the National Register of Historic Places. The Breakers is set amidst 140 acres of breathtaking oceanfront property, and offers extensive amenities and activities. For hotel information and reservations, call (888) 273-2537.

Hotel Rates: \$425 plus tax; single or double occupancy

Angiogenesis, Exudation, and Degeneration 2023 – Virtual Edition

Angiogenesis 2023 follows the tradition of excellence established by Bascom Palmer's widely acclaimed Angiogenesis programs between 2004 and 2022. Designed for retina specialists, general ophthalmologists and researchers, the current program will review the latest in imaging, translational research, and clinical trials with an emphasis on how these results will impact clinical ophthalmology. We will emphasize early phase clinical trials and recently completed studies focused on the treatment of a wide range of retinal diseases with special emphasis on age-related macular degeneration, diabetic retinopathy, uveitis, and retinal degenerations.

Course Directors:

Phillip J. Rosenfeld, MD, PhD
Harry W. Flynn, Jr., MD
Thomas A. Albini, MD

Interactive Consultations in Cornea, Cataract and Refractive Surgery 2023

This two-day course is designed for ophthalmologists whose clinical practices include general ophthalmology, cataract, refractive surgery, and cornea. Using an interactive, case-based approach, the distinguished speakers will present a variety of vignettes and practice pearls to illustrate clinical dilemmas in the diagnosis and management of anterior segment diseases. The 2-day program will focus on cataract, refractive surgery, disorders of the cornea and external disease.

Course Directors:

Bascom Palmer Diagnostic Ultrasound Course: Clinical Ultrasonography for the Clinician

This one-day course will provide instruction, diagnostics and hands-on experience on the clinical use and application of ophthalmic ultrasound. The program is designed for practicing ophthalmologists, residents in training, and retina specialists looking to enhance and master the use of ophthalmic ultrasound to actively manage patients in their clinics. The program will review the history, instrument development, current available instrumentations as well as diagnostic concepts used for Posterior and Anterior (UHF) ophthalmic ultrasonography. In addition to didactics, the course will provide hands-on experience, case-based presentations and discussions with faculty and participants that will highlight the applicability of ophthalmic ultrasound in clinical decision making for the diagnosis and management of ocular pathology.

Nasser Al-Rashid Orbital Research Colloquium

This one-day scientific meeting assembles a broad array of research scientists and clinicians whose expertise and focus are principally directed to orbital oncology, traumatic optic nerve injury, and stem cell and biomedical innovations for immediate clinical application. The core objective of the meeting is to move the orbital research community to a more multi- and interdisciplinary scientific mindset by removing barriers and creating a conducive environment to collaborative interactions among investigators from different disciplines. The presentations will highlight cutting-edge molecular biology, genomic, and proteomic approaches to better understand the molecular underpinnings of these diseases and bring the state-of-the-art in advanced biomaterials and regenerative medicine technologies for translating research findings into clinical reality – with the ultimate aim of achieving improved visual outcomes and quality of life for orbital diseases in which effective therapy remains elusive.

Course Directors:

BascomPalmerLearn.org

Bascom Palmer Learn (bascompalmerlearn.org) is an online learning portal and educational resource for ophthalmologists and eye care professionals. This reservoir of educational tools provides free access to an ever-increasing collection of Bascom Palmer's Grand Rounds lectures, ophthalmic images, surgical videos, medical student courses, and other lectures. Physicians can also obtain continuing medical education (CME) credits.

Visit your online resource for ophthalmic education:

Frontiers in Vision Science Lecture Series

The future of ophthalmology lies in the creation of new knowledge and technology and its rapid translation into the clinic to help people. Bascom Palmer Eye Institute's research mission is to make this happen through interdisciplinary team research and cutting-edge technology. The **Frontiers in Vision Science Lecture Series**, now in its 21st successful season features distinguished scientists from across the nation.

Grand Rounds

José A. Berrocal Auditorium, Bascom Palmer Eye Institute

Bascom Palmer offers a wide variety of educational opportunities in addition to its highly regarded continuing medical education courses and distinguished lecture series.

Each Thursday morning from 7:00 a.m. to 8:30 a.m., Grand Rounds is presented **virtually**. Faculty, residents, fellows, medical students, and the global ophthalmology community come together to learn of the newest clinical research and treatments to increase their medical knowledge and improve patient care.

If you would like to virtually attend Grand Rounds, please contact Patricia Gonzalez at pmg101@miami.edu.
