

UHealth

COMPREHENSIVE DIABETES CENTER

As South Florida's only university-based health care system, the **UHealth Comprehensive Diabetes Center** offers medical care that is research-driven and supplemented by health care experts who teach tomorrow's talented medical minds. Our team of specialists is focused on providing care that is tailored to best serve the specific needs of your patient.

AREAS OF EXPERTISE

We treat patients who have Type 1 and Type 2 Diabetes, secondary and genetic forms of diabetes, highly complicated diabetes, and diabetes during pregnancy.

Our team of specialists manages all aspects of diabetes and any complications, creating a complete and tailored treatment plan for your patients that includes:

- **Individualized Medical Management:** This approach ensures better outcomes through personalized chronic disease management.
- **Education:** Your patients will learn to lead healthier lives through diabetes self-management education, including nutritional counseling.
- **Preventive Care:** We provide preventive surveillance and interventions for high risk, pre-diabetes patients.
- **Device Assistance:** This includes insulin pump training and continuous glucose monitoring.

SPECIALISTS

Rajesh Garg, M.D., Director of the Comprehensive Diabetes Center, and Ernesto Bernal-Mizrachi, M.D., Chief of the Division of Endocrinology, Diabetes, and Metabolism, lead a multidisciplinary team to ensure your patients with diabetes get the most advanced medical care, education, and aggressive prevention and management of complications all at one location. Our staff includes:

- Nephrologist
- Cardiologist
- Ophthalmologist
- Podiatrist
- Sleep Medicine Specialist
- Dietitian
- Nurse practitioners specializing in diabetes education
