

HEAD & NECK SURGERY

The Sylvester Comprehensive Cancer Center head and neck surgery division is one of the largest in the country and covers every aspect of head and neck care including microvascular reconstruction, voice restoration, and speech pathology. Known for successful clinical trials and research in head, neck, and oral treatments, the division is comprised of a comprehensive and multi-specialty team focused on the diagnosis and treatment of all head and neck conditions. Our team trains in minimally invasive surgeries and participates on a national level in trials related to robotic surgery and sentinel node biopsy. We also offer a multidisciplinary tumor board, which has been established for more than 40 years, allowing our team to provide the best outcomes to patients.

Our multilingual faculty includes members fluent in Spanish, Arabic, and French.
