Bascom Palmer Eye Institute XL Inter-American Course in Clinical Ophthalmology

November 4-7, 2018

Bascom Palmer Eye Institute would like to invite you to come to Miami to participate in our *XL Inter-American Course in Clinical Ophthalmology*. The Inter-American Course is designed for practicing ophthalmologists in Latin America and the Caribbean, to provide maximum emphasis on practical approaches to select clinical problems. Held every year in Miami after the American Academy of Ophthalmology meeting, hundreds of ophthalmologists from over 30 countries benefit from the knowledge and expertise shared by an outstanding guest faculty, as well as the faculty of Bascom Palmer Eye Institute. In addition to the course material presented with simultaneous English-Spanish translation, more than 50 commercial exhibitors participate in an accompanying trade show. We look forward to celebrating our 40th year of Curso with you!

Visual Electrophysiology Course

(Optional Course)

Visual Electrophysiology in Times of Gene Therapy

(If you plan on attending this optional course, please make sure you register by checking the box in the registration form)

Visual electrophysiology is a valuable tool in the diagnosis of inherited retinal diseases that currently can be treated using gene therapy. Recent developments in this field granted a comprehensive course that integrates basic concepts and clinical applications of this technology. All visual electrophysiology modalities (ERG, VEP, EOG, mfERG, PERG, mfVEP) will be reviewed, followed by clinical case presentations and discussion. We will emphasize the correct indications and interpretation of the different studies. A wet lab session will be available for participants to gain hands-on exposure in performing visual electrophysiology studies.
